PROFESSIONAL SUMMARY

Highly analytical Computer Science graduate with a 9.02 CGPA, possessing strong problem-solving skills and practical, hands-on experience in Python and SQL. Proven expertise in the design and development of automated data pipelines and processing systems, adept at working with real-world datasets and cloud-based platforms to drive operational efficiency. Eager to leverage modern data engineering tools and best practices.

TECHNICAL SKILLS

Languages & Databases: Python, SQL (MySQL, SOQL), C++ | Data & AI Tools: Pandas, Scikit-Learn, Gemini, Claude, n8n, Zapier | Backend & Frameworks: FastAPI, REST APIs, Git, GitHub | Other: Salesforce (Apex, Agentforce)

EXPERIENCE

Data Engineering Intern | Tata Consultancy Services | Jan 2026 - Jul 2026

- Engineered scalable Python automation scripts for data processing systems, streamlining workflows and demonstrating practical, hands-on experience in handling real-world datasets through dynamic file date extraction and advanced data mapping.
- Applied strong analytical and problem-solving skills to develop custom logic for resolving complex SSO data mismatches and prioritizing data fields across multiple SQL queries, enhancing data processing system efficiency and accuracy.
- Utilized SOQL and backend logic for the design and development of ETL data pipelines, processing large-scale real-world datasets and ensuring seamless integration across cloud-based platforms, improving operational efficiency.

Software Development Intern | Glow Genesis Skincare Pvt. Ltd. | Sept 2024 - Feb 2025

- Developed and enhanced application features, focusing on system performance and responsiveness, contributing to robust processing systems.
- Integrated APIs and applied problem-solving skills to resolve application data issues, collaborating to deliver stable and scalable solutions for data handling.

PROJECTS

Autonomous Job Application Data Pipeline | 2026

- Architected an end-to-end autonomous data pipeline using Playwright to continuously monitor external sources, parse unstructured job links, and automate complex data processing workflows.
- Engineered an AI-driven data processing system to dynamically extract job requirements from real-world datasets and cross-reference them with a master profile, demonstrating advanced data engineering tools.
- Designed a scalable, headless execution environment for the data pipeline, featuring a Human-in-the-Loop system to manage security challenges, demonstrating robust system architecture for data processing.

Railway Station Navigation System | 2026

- Architected, designed, and implemented a highly scalable AR indoor navigation solution, demonstrating strong problem-solving skills in complex system design.
- Implemented and optimized FastAPI APIs for efficient data processing and real-time updates, showcasing practical experience in backend development for data-intensive applications.

Customer Churn Prediction Platform | 2025

- Developed a machine learning-based customer churn prediction platform using Python, SQL, Pandas, and Scikit-Learn, demonstrating practical, hands-on experience in analyzing real-world datasets (7,000+ customer records) and applying programming knowledge.
- Performed comprehensive data preprocessing and predictive modeling, utilizing strong analytical skills to track key metrics and user data, driving operational excellence and generating actionable insights from real-world datasets.

EDUCATION

B.Tech Computer Science & Business Systems — JSPM's Rajarshi Shahu College of Engineering, Pune (Nov 2022 - June 2026) - CGPA: 9.02

CERTIFICATIONS & LEADERSHIP

- Salesforce Certified Agentforce Specialist (Dec 2025)
- Co-Organizer, TEDxJSPMRSCOE (2024-2025)
- Training and Placement Co-ordinator, RSCOE (2024-2025)
