PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student with a strong foundation in Python and hands-on experience in AI/ML, LLMs, and NLP. Proven ability to develop and deploy Machine Learning algorithms, implement Retrieval Augmented Generation (RAG) systems, and integrate RESTful APIs for scalable solutions. Skilled in leveraging frameworks like Scikit-learn, Pandas, and FastAPI to drive data-driven insights and optimize AI-powered applications.

TECHNICAL SKILLS

Python, LLMs (Claude, ChatGPT, Gemini), FastAPI, RESTful APIs, Retrieval Augmented Generation (RAG), Machine Learning algorithms, Scikit-learn, Pandas, NumPy, NLP, Transformers, Git, MySQL, C++, Salesforce (Apex, SOQL, Flows, Agentforce, Salesforce Admin), Testing Frameworks (Apex Test Classes), GitHub, VS Code, n8n, Zapier, Make.com, Emergent, Codex, Flutter, Unity, Data Structures & Algorithms, Operating Systems, DBMS, Object-Oriented Programming, Computer Networks

EXPERIENCE

Salesforce Developer Intern - Jaguar Land Rover Project | Tata Consultancy Services | Jan 2026 - Jul 2026

- Developed and customized scalable Salesforce solutions, leveraging Apex and Flows to automate complex business processes and enhance operational efficiency.
- Architected robust CRM automation workflows and implemented automated test suites for Apex integrations, ensuring a stable and scalable platform capable of handling high-volume data and API interactions.

Software Development Intern | Glow Genesis Skincare Pvt. Ltd. | Sept 2024 - Feb 2025

- Developed and enhanced mobile application features, focusing on performance optimization and user experience, while ensuring application responsiveness and stability.
- Integrated RESTful APIs to connect backend services, resolved complex application issues, and collaborated with the development team to deliver stable and scalable mobile solutions.

PROJECTS

Railway Station Navigation System (Capstone Project) | 2026

- Architected, designed, and implemented a highly scalable indoor navigation solution, leveraging Python-based backend services to guide users across multi-point indoor paths with real-time directions.
- Implemented and optimized FastAPI APIs for efficient route generation and navigation updates, significantly reducing response latency and enabling near real-time user guidance for a robust, scalable system.

Customer Churn Prediction Platforms | 2025

- Developed a robust Machine Learning-based customer churn prediction platform using Python, MySQL, Pandas, and Scikit-learn to analyze over 7,000 customer records and accurately identify customers at high risk of churn.
- Executed comprehensive data preprocessing and predictive modeling with Python, leveraging Scikit-learn for model development, and generated actionable customer retention insights through data-driven visualizations.

Generative AI Job Application Assistant | 2025

- Developed a Generative AI-powered job application assistant leveraging LLMs (Google Gemini) and Python to analyze resumes, extract job requirements, perform candidate-job matching, and generate tailored resume content in structured JSON format.
- Implemented advanced NLP techniques, including concepts of Retrieval Augmented Generation (RAG) for content enhancement, to automate cover letter generation and resume optimization, improving keyword relevance, skill alignment, and ATS compatibility.

EDUCATION

B.Tech Computer Science & Business Systems — JSPM's Rajarshi Shahu College of Engineering, Pune (Nov 2022 - June 2026) - CGPA: 9.02

Higher Secondary Examination, CBSE — Army Public School, Devlali (April 2020 - June 2022) - Percentage: 83.4%

CERTIFICATIONS & LEADERSHIP

- Salesforce Certified Agentforce Specialist (Dec 2025)
- Co-Organizer, TEDxJSPMRSCOE (2024-2025)
- Training and Placement Co-ordinator, RSCOE (2024-2025)
