PROFESSIONAL SUMMARY

Aspiring Formal Verification Engineer with a strong foundation in Computer Architecture, logic design, and hardware verification. Proficient in C/C++ and Python for scripting and automation. Experienced in applying rigorous testing methodologies, including model checking and SVA, to ensure hardware reliability and design integrity. Passionate about leveraging formal tools like JasperGold/VC Formal to validate complex digital systems.

TECHNICAL SKILLS

Python, C++, Computer Architecture, Logic Design, Formal Verification, SVA, Model Checking, JasperGold, VC Formal, Hardware Verification, Git, GitHub, Data Structures & Algorithms, Operating Systems, DBMS, Object-Oriented Programming, Computer Networks, Salesforce (Apex, SOQL, Flows), RestAPI

EXPERIENCE

Salesforce Developer Intern - Jaguar Land Rover Project | Tata Consultancy Services | Jan 2026 - Jul 2026

- Applied rigorous testing and verification principles to automate business processes, ensuring high-quality code and system reliability.
- Developed automated test suites using Apex, mirroring formal verification logic to validate system stability and ensure robust performance in complex enterprise environments.

Software Development Intern | Glow Genesis Skincare Pvt. Ltd. | Sept 2024 - Feb 2025

- Utilized C++ and Python for backend logic optimization, focusing on performance and hardware-level efficiency.
- Collaborated on debugging and verifying complex application features, applying systematic testing approaches to ensure scalable and stable software solutions.

PROJECTS

Railway Station Navigation System (Capstone Project) | 2026

- Designed a scalable navigation architecture, applying logic design principles to optimize pathfinding algorithms and reduce latency.
- Implemented FastAPI-based backend services using Python, focusing on data integrity and efficient resource management similar to hardware verification workflows.

Customer Churn Prediction Platforms | 2025

- Leveraged Python and data modeling to analyze complex datasets, applying statistical verification to identify patterns and ensure model accuracy.
- Performed rigorous data preprocessing and validation, ensuring the predictive platform met high standards of reliability and operational excellence.

Generative AI Job Application Assistant | 2025

- Developed an AI-powered assistant using Python to perform automated requirement matching, utilizing logic-based extraction to ensure high-fidelity candidate-job alignment.
- Implemented structured JSON output generation, ensuring data consistency and adherence to strict schema requirements for ATS compatibility.

EDUCATION

B.Tech Computer Science & Business Systems — JSPM's Rajarshi Shahu College of Engineering, Pune (Nov 2022 - June 2026) - CGPA: 9.02

Higher Secondary Examination, CBSE — Army Public School, Devlali (April 2020 - June 2022) - Percentage: 83.4%

CERTIFICATIONS & LEADERSHIP

- Salesforce Certified Agentforce Specialist (Dec 2025)
- Co-Organizer, TEDxJSPMRSCOE (2024-2025)
- Training and Placement Co-ordinator, RSCOE (2024-2025)
